Subject Index of Volume 26

Acetone
  potassium sulphate precipitation from aqueous solution by salting-out with, 93
Adsorbents
  porous, mass and heat transport in, 59
Adsorber
  packed bed, used for treatment of unknown multi-solute wastewater, prediction of breakthrough curve of, 247
Aerosols
  role of minute droplets in separation of, from gases, 201

Biosynthesis products
  simulation of fluidized bed drying of, 139
Boiling
  of aqueous calcium sulphate solutions, bubble dynamics and scale formation during, 15
Breakthrough curve
  of packed bed adsorber used for treatment of unknown multi-solute wastewater, prediction of, 247
Bubble columns
  hydrodynamics in, 101
  interfacial areas and gas hold-ups in, at elevated pressures, 1
  liquid-phase mixing model for hydrodynamics of, 16
Bubble dynamics
  and scale formation during boiling of aqueous calcium sulphate solutions, 15
Bubbles
  single, theoretical structure and correlating equation for motion of, 269

Catalyst pellet
  porous, analysis of structure of steady-state solutions for, 45
Chemical kinetics
  nonlinear, continuous lumping of, 63
Continuous tank reactors
  heat integration of, into heat recovery systems, energy savings through, 81

Density
  of eight binary liquid mixtures, measurement of, 71
Diffusion
  in porous materials partially wetted with a binary mixture, 35
Diffusivity
  effective, in porous particles, influence of pore diameter distribution on determination of, 121
  of eight binary liquid mixtures, measurement of, 71
  thermal, determined by photoacoustic spectroscopy, 257
Dispersion
  packed bed thermal, models and consistent sets of coefficients, 263
Droplets
  minute, role of, in separation of aerosols from gases, 201
Drying
  fluidized bed, of biosynthesis products, simulation of, 139
  of loose wool, influence of unevenness of wool mat on, 127
  vacuum contact, of mechanically agitated, coarse, hygroscopic bulk material, 225
Drying process development
  characterization of product qualities and application in, 27

Energy savings
  through heat integration of continuous tank reactors into heat recovery systems, 81
Extraction
  countercurrent near-critical fluid, enhancement of efficiency of, by pressure pulsation, 207

Fabric cleaning
  in pulse-jet filters, 179
Filters
  pulse-jet, fabric cleaning in, 179
Fixed bed reactor
  three-phase, local solid–liquid mass transfer coefficients in, 111
Flow patterns
  gas–liquid, in chemical engineering systems, diagnostics of, 147
Fluidized bed drying
  of biosynthesis products, simulation of, 139

Granulate mixing mechanisms
  local, theoretical and experimental investigations into, 193

Heat recovery systems
  energy savings through heat integration of continuous tank reactors into, 81
Heat transfer
  in annulus with rotating inner cylinder, 173
Heat transport
  in porous adsorbents, 59
Hold-ups
  gas, and interfacial areas in bubble columns and packed bubble columns at elevated pressures, 1
Hydrodynamics
  in bubble columns, 101
  of bubble columns, liquid-phase mixing model for, 165
Hygroscopic bulk material
  mechanically agitated, coarse, vacuum contact drying of, 225

Interfacial areas
and gas hold-ups in bubble columns and packed bubble columns at elevated pressures, 1

Kinetic comparison
between interfacial and homogeneous reaction pathway in formation of Co(II) dithizonate in liquid/liquid system, 215
Kinetics
nonlinear chemical, continuous lumping of, 63

Mass transfer coefficients
local solid–liquid, in three-phase fixed bed reactor, 111
Mass transport
in porous adsorbents, 59
Mixing mechanisms
local granulate, theoretical and experimental investigations into, 193
Mixing model
liquid-phase, for hydrodynamics of bubble columns, 165

Nonlinear chemical kinetics
continuous lumping of, 63

Packed bed adsorber
used for treatment of unknown multi-solute wastewater, prediction of breakthrough curve of, 247
Packed bed thermal dispersion
models and consistent sets of coefficients, 263
Packed bubble columns
interfacial areas and gas hold-ups in, at elevated pressures, 1
Photoacoustic spectroscopy
thermal diffusivities determined by, 257
Pore diameter distribution
influence of, on determination of effective diffusivity in porous particles, 121
Porous adsorbents
mass and heat transport in, 59
Porous catalyst pellet
analysis of structure of steady-state solutions for, 45
Porous materials
partially wetted with a binary mixture, diffusion in, 35
Porous media
transport properties of, from microgeometry of three-dimensional Voronoi network, 237
Porous particles
influence of pore diameter distribution on determination of effective diffusivity in, 121
Precipitation
of potassium sulphate from aqueous solution by salting-out with acetone, 93
Pressure pulsation
enhancement of efficiency of countercurrent near-critical fluid extraction by, 207
Product qualities
characterization of, and application in drying process development, 27
Pulse-jet filters
fabric cleaning in, 179

Reaction pathway
kinetic comparison between interfacial and homogeneous, in formation of Co(II) dithizonate in liquid/liquid system, 215
Refractivity
of eight binary liquid mixtures, measurement of, 71

Salting-out
with acetone, potassium sulphate precipitation from aqueous solution by, 93
Scale formation
and bubble dynamics during boiling of aqueous calcium sulphate solutions, 15
Separation
of aerosols from gases, role of minute droplets in, 201
Steady-state solutions
for a porous catalyst pellet, analysis of structure of, 45

Thermal diffusivities
determined by photoacoustic spectroscopy, 257
Thermal dispersion
packed bed, models and consistent sets of coefficients, 263
Transport properties
of porous media from microgeometry of three-dimensional Voronoi network, 237

Uncertainty
in chemical engineering, review of applications of various types of, 185

Vacuum contact drying
of mechanically agitated, coarse, hygroscopic bulk material, 225
Viscosity
of eight binary liquid mixtures, measurement of, 71
Voronoi network
three-dimensional, transport properties of porous media from microgeometry of, 237

Wastewater
unknown multi-solute, prediction of breakthrough curve of packed bed adsorber used for treatment of, 247
Wool
loose, influence of unevenness of wool mat on drying of, 127
